GitHub: github.com/proteam123

Professional Summary

Artificial Intelligence and Data Science undergraduate with practical exposure to AI-driven academic and fitness applications. Experienced in applying computer vision, basic machine learning concepts, and web technologies to solve real-world problems. Interested in developing structured, user-focused AI systems with strong academic foundations.

Education

B.Tech in Artificial Intelligence and Data Science

MES College of Engineering, Kuttippuram, Kerala

Expected Graduation: June 2026

Key Projects

AI Pose Estimation and Curl Tracker

Mini Project

- Developed an AI-powered system to track human body posture and bicep curl movements in real time.
- Used pose estimation techniques to detect joint angles and count exercise repetitions.
- Improved workout accuracy by providing visual feedback using computer vision.

Mentora-AI – AI Mentor and Tutor System

Main Project

- Designed an AI-based academic mentor system to support students, teachers, and parents.
- Automated attendance tracking, performance monitoring, and communication workflows.
- Integrated NLP-based features to provide personalized learning guidance.

Seminar

Automatic Detection of Students' Engagement During Online Learning

- Presented a seminar on AI-based student engagement detection using deep learning techniques.
- Explained ensemble learning approaches involving CNN and ResNet models for engagement analysis.
- Discussed real-world applications of intelligent learning analytics in online education systems.

Technical Skills

Programming Languages: Python, JavaScript, C, R, HTML, CSS

Frameworks & Libraries: Flask, Streamlit, OpenCV, MediaPipe, Scikit-learn

AI & ML Concepts: Machine Learning Fundamentals, Computer Vision Basics, Pose Estimation, NLP Fundamentals

Tools & Platforms: Git, GitHub, VS Code, Twilio

Core Skills: Problem Solving, Team Collaboration, Academic Research, Prototyping

Certifications

Cyber Security and Ethical Hacking Internship

Completed a 5-day hands-on internship covering cybersecurity fundamentals, ethical hacking concepts, and practical exposure to Kali Linux tools for security testing.

AI/ML Internship – OutriX

Completed a 1-month remote internship focused on artificial intelligence and machine learning, involving hands-on model development, project-based learning, and applied AI/ML skill enhancement.

Languages

English, Malayalam

Areas of Interest

Artificial Intelligence in Education, Computer Vision Applications, Fitness Technology, Academic AI Systems, Web-Based AI Tools, Data Analysis Foundations
